DETAILED ACTION

1. An Amendment was filed 9/7/04 in which Claims 1, 5-8 and 16 were also cancelled, and Claims 20 and 21 added.

2. **Claims 2-4, 9-15 and 17-21 are allowable** because prior art does not disclose a support assembly for a ground-engaging component of a vehicle, comprising, *inter alia*,

a base with a column that moves between traveling and storage positions via a locking assembly,

the assembly including a connecting member that pivotably connects the column to the base,

a locking member engageable with a first formation on the connecting member to retain the column in the traveling position,

an interlock component pivotable in a first direction, and between a position that prevents the locking member from disengaging from the first formation, and a position at which the locking member is disengageable from the first formation,

an actuator,

wherein, when the column is in the traveling position,

the actuator is movable from a rest position, in a second direction opposite from the first direction, to initiate a release of the locking assembly by causing the locking member to disengage from the first formation.
